

Consolidating the Past, Creating the Future  
#cis2013, #cscw2013

## 3rd Workshop on Collaborative Information Seeking At the ACM CSCW 2013 Conference

February 24, 2013

San Antonio, Texas

<http://collab.infoseeking.org/events/cscw2013workshop/>

### Themes

- **Theories and models** for Collaborative Information Seeking (CIS).
- **Methodologies** for studying various CIS issues, particularly, user behavior in CIS environments, collaborative information processes and task-related CIS.
- Integration of CIS **models and frameworks** into existing theories, models, tools or applications.
- **Application** of CIS in different domains – requirements, issues and benefits.

### Objectives

- Discuss how **theories and models** from traditional models of information seeking can help us understand and evaluate different aspects of CIS processes.
- Identify a **framework** to study and evaluate CIS systems and methods.
- Converse about how CIS researchers could benefit from various theories and models from **CSCW and CSCL** fields, and vice versa.
- Come up with a **research agenda** for CIS in the form of challenges and opportunities.
- Relate CIS foundations and theories to **work-related applications**

### Important Dates

November 14, 2012: Position papers due (see workshop website for format)

December 11, 2012: Notifications

February 24, 2013: Workshop

### Organizers

Chirag Shah, Rutgers University

Preben Hansen, Swedish Institute of CS

Rob Capra, UNC Chapel Hill
